

# SALES HISTORY DASHLET FOR SUGARCRM®

Get straight to the point with the Sales History Dashlet for Sugar, a custom dashboard that allows you to quickly access the data you need most.

The Sales History Dashlet allows you to display and filter trackable data in Sugar in a flexible manner, while still respecting the visibility and permissions of the module displayed. Additionally, if you need to pull information from any external data sources, the Sales History Dashlet for Sugar can make that happen.

## FEATURES & BENEFITS

### 01

Can be configured to track and visualize any metric.

### 03

Rank and compare users to identify your best performers.

### 05

View sales history on any account record view without having to run a report.

### 02

View and track sales forecast by product/type/manufacturer.

### 04

Compare sales history to previous years or months at a glance.
