

AI Security & Governance Review

Know exactly where your AI security stands and have the right policies in place.

AT A GLANCE

- A focused half-day remote review of your AI security posture.
- Governance and usage policy documents, created or updated for you.
- An executive summary your leadership can act on.

In most companies, AI adoption has outrun AI policy.

This review closes the gap, and puts it in writing.

Faye is registered in the Claude Partner Network with Claude Certified Architects on staff. We put Claude to work safely, quickly, and with adoption that sticks. Shadow AI tools, unclear permissions, no usage guidelines; most teams are using AI faster than they're governing it.

The AI Security & Governance Review is a focused engagement: we assess how AI is actually being used across your organization, review your security posture and permissions, and deliver the governance and usage policies to match. Findings, documents, and recommendations; in writing, ready for leadership.

What's included

Pre-Review Alignment

- A meeting to scope your environment, tools, and concerns before the session.

Half-Day Remote Session

- A structured working review of your AI security posture: how AI is used, by whom, and with what access.

Governance & Usage Policies

- Creation or update of your AI governance and usage policy documents.

Executive Summary

- Findings and prioritized recommendations, summarized for leadership.

How it works

Fixed scope, three steps.

01

Align

A scoping meeting: your environment, your tools, and what's keeping you up at night.

02

Review

A half-day remote working session reviewing how AI is used and governed across your organization.

03

Deliver

You receive your governance and usage policy documents plus an executive summary of findings and recommendations.

What you walk away with

- ✓ A clear picture of how AI is actually being used across your organization.
- ✓ AI governance and usage policy documents, created or updated.
- ✓ An executive summary with findings and prioritized recommendations.
- ✓ A confident answer when leadership, clients, or auditors ask: "what's our AI policy?"

WHO IT'S FOR

Companies that need a focused review of their AI security setup and the policies to match; whether you're preparing to roll out AI, or catching up with tools your team already uses.

Where it can lead

Every engagement stands on its own; the Review is complete in itself, and never a prerequisite. That said, the findings often point somewhere:

Claude Jumpstart

Roll out Claude with your new policies built in from day one: governance, permissions, connectors, custom skills, and training in one fixed-scope program.

Axia for Claude

The team that does the doing: a strategist, technologist, and concierge who keep Claude improving month after month — agent management, enhancements, and a success plan reviewed against your goals.
