

AI Strategy Workshop

One focused engagement. A clear, prioritized AI roadmap.

AT A GLANCE

- Two formats: one day for smaller teams, or two days onsite for larger, multi-department organizations.
- Every AI opportunity ranked by impact and effort.
- You leave with a 30/60/90-day actionable roadmap and an executive summary.

Most teams don't have an AI problem; they have a "where do we start?" problem.

The AI Strategy Workshop turns that question into a ranked, sequenced plan.

Faye is registered in the Claude Partner Network with Claude Certified Architects on staff. We put Claude to work safely, quickly, and with adoption that sticks.

Faye's strategists come to you and work through your goals, systems, and workflows with the people who know them best. We identify where AI will pay off first, rank every opportunity by impact and effort, and turn the result into a concrete 30/60/90-day roadmap your team can start executing the next morning.

What's included

Pre-Workshop Alignment

- A working session before we arrive: goals, attendees, and the systems that matter

Onsite Workshop

- One or two full days with your team, mapping workflows and surfacing the highest-impact AI opportunities

Opportunity Prioritization & Impact

- Every opportunity ranked by impact and effort, so you know exactly what to do first

AI 30/60/90-Day Roadmap

- A sequenced short-term roadmap tying each initiative to an owner and an outcome

Executive Summary

- A leadership-ready summary of findings, priorities, and recommended next steps

Choose your format

One-Day Workshop

For smaller teams that want a practical AI roadmap fast: one focused day onsite covering your highest-priority workflows, ending in a ranked opportunity list and roadmap.

Two-Day Workshop

For larger organizations or multiple departments: two days onsite to go deeper across teams, surface opportunities a single day can't reach, and build shared ownership of the plan.

How it works

Fixed scope, three steps.

01

Align

A pre-workshop session to agree on goals, attendees, and scope.

02

Workshop

Onsite with your team: workflow mapping, opportunity discovery, and prioritization.

03

Roadmap

You receive the ranked opportunity list, the 30/60/90-day roadmap, and the executive summary.

What you walk away with

- ✓ A ranked list of AI opportunities, scored by impact and effort
- ✓ A 30/60/90-day roadmap with an owner and an outcome for each initiative
- ✓ An executive summary your leadership can act on
- ✓ A clear view of where AI pays off first for your business, whatever you choose to do next

WHO IT'S FOR

Companies that want a practical AI roadmap, not a months-long research project. Choose one day for smaller teams, or two days for larger teams and multiple departments.

Where it can lead

Every engagement stands on its own, the Workshop is complete in itself, and never a prerequisite. That said, most roadmaps point somewhere:

Claude Jumpstart

Ready to act on the roadmap? Jumpstart takes your top priorities live: governance, connectors, custom skills, and training, in one fixed-scope program.

AI Security & Governance Review

If the workshop surfaces governance gaps, a focused half-day review delivers updated AI usage and governance policies your leadership can stand behind.
