

Claude Jumpstart

From licenses to live: Claude rolled out, governed, and adopted in weeks.

AT A GLANCE

- Weeks from kickoff to live.
- Recommended rollout scope: up to 50 Claude users across up to 3 departments.
- Up to 5 custom skills built around your workflows.

Buying licenses is easy. The hard part is an AI rollout your team actually uses.

Claude Jumpstart is the difference between having Claude and working with it.

Faye is registered in the Claude Partner Network with Claude Certified Architects on staff. We put Claude to work safely, quickly, and with adoption that sticks. Most Claude rollouts stall for the same three reasons: no governance, no connection to the systems where work actually happens, and no training beyond a login.

Claude Jumpstart is Faye's fixed-scope implementation program that takes care of all three. Led by a dedicated project manager, we design your Claude environment around real outcomes, secure it to your IT's standards, wire it into your systems of record, build custom skills for your highest-value workflows, and train every user involved. Go live in weeks, with adoption measured and reviewed at 30 days.

What's included

Strategy & Design

- Business goals and outcome review, AI readiness assessment, and infrastructure review across your systems of record
- Outcome-driven project plan with skills prioritized by impact

Setup & Governance

- Org instructions, branding and brand-voice skills, and company policies built in
- Security parameters; permissions, ownership, and usage policies; coordinated directly with your IT, including desktop rollout

Skills & Connectors

- Pre-built connectors and MCPs into the tools you already use
- Proven skills and plugins installed from our library
- Up to 5 custom skills designed and built around your team's highest-value workflows

Training & Enablement

- Admin training for your internal owners and Claude 101 for every user
- Up to 2 hands-on skill workshops using your real use cases, plus drop-in office hours

Go-Live & Post-Launch Support

- Two weeks of hypercare after launch, while new habits form
- 30-day post-launch review measuring adoption and outcomes against the plan

Dedicated Project Management

- One accountable Faye team from kickoff to review: a single point of contact, a real plan, and status you never have to chase

How it works

Fixed scope from day one.

01

Align

Goals, readiness, and systems reviewed; the project plan prioritized by outcome.

02

Set Up

Organization configured; security, permissions, and governance locked in with IT.

03

Connect & Build

Connectors installed; up to 5 custom skills built around your workflows.

04

Train

Admins, users, and champions enabled; Claude 101, workshops, office hours.

05

Launch & Review

Go-live with 2 weeks of hypercare, then the 30-day adoption review.

What you walk away with

- ✓

A governed Claude workspace your IT signed off on; permissions, ownership, and usage policies in place
- ✓

Up to 5 custom skills built around your highest-value workflows
- ✓

Brand and brand-voice skills, so Claude’s output sounds like your company
- ✓

Claude connected to your systems of record through pre-built connectors and MCPs
- ✓

A trained team; admins, everyday users, and internal champions
- ✓

A 30-day adoption review with measured outcomes and a clear recommendation for what’s next

WHO IT'S FOR

Companies that need their team up and running on AI productivity tools ASAP, safely. Claude Jumpstart (Pro) is scoped for up to 50 users across up to 3 departments. Rolling out to a bigger team? Ask us about Claude Jumpstart (Enterprise).

Extend your Jumpstart

We recognize that a Jumpstart is often just the beginning. Once you’re up and running, you may need more — and Faye is here for your entire Claude journey, with additional capabilities ready when you are.

Development Add-On

Rolling Claude Code out to engineering? Add repository integration, skill management with CI/CD best practices, and an internal distribution strategy, scoped for up to 20 engineers.

Fractional AI Strategist

Strategic AI leadership — a designated senior strategist with a seat at your executive table, setting direction and priorities for AI across your business.

Axia for Claude

The team that does the doing: a strategist, technologist, and concierge who keep Claude improving month after month — agent management, enhancements, and a success plan reviewed against your goals.
